

WHICH APPLICATION ACCESS SOLUTION IS THE BEST FIT FOR YOUR ORGANIZATION?

If you're looking for a fast and secure solution to access applications anywhere, then the logical choice is GO-Global® from GraphOn® Corporation. It's the easy, plug-and-play application delivery solution that enables instantaneous access to existing Windows, UNIX* and Linux* applications from virtually any platform and operating system. What's more, GO-Global eliminates the need for complex infrastructure such as Citrix® XenApp® or limited Windows-only solutions such as Microsoft® Remote Desktop Services. And only GO-Global provides a fully customizable solution with private labeling options, server and client software development kits (SDKs), and product bundling. So go with GO-Global. You'll lower your TCO and maximize your ROI.

COMPANY VALUE PROPOSITIONS

GraphOn GO-Global

- The fast and secure application access solution
- Experienced solution provider for independent software vendors (ISVs), Software as a Service providers, SMBs, and the enterprise
- Personal customer-to-vendor support relationship – upgrades and unlimited support cases are included
- Fully customizable via private labeling and SDKs

Microsoft Remote Desktop Services

- The integrated OS solution for desktop remote access
- Large company mentality with Windows-only focus
- Complex solution
- Indirect or distributed channel sales and support

Citrix XenApp

- The server-based computing market leader
- Management-intensive solution designed to handle all aspects of application publishing
- Expensive and complex solution
- Indirect or distributed channel sales and support

SOLUTION VALUE

GraphOn GO-Global

- The fast and simple application-centric solution
- Enables instantly-available Windows, UNIX, and Linux applications from most platforms
- Simplified and affordable licensing model – a true concurrent licensing deployment
- Easy to install, configure, and manage
- Integrates seamlessly with existing heterogeneous infrastructure, providing complete cross-platform compatibility
- Supports Web APIs to enable integration with existing Web applications**
- The high-performance, low-bandwidth, secure, customizable solution

Microsoft Remote Desktop Services

- Focused on desktop or OS deployment
- Desktop remote access for Windows-only devices
- Easy remote server management for IT professionals
- Geared towards smaller departmental installations

Citrix XenApp

- Expensive enterprise-focused solution to enhance Microsoft RDS
- Encompasses application management tools and infrastructure
- Geared toward large server farm installations that require comprehensive and expensive management tools

* Enabled with GO-Global for UNIX.

**Enabled with GO-Global Gateway.
